PROBLEM 41

Problem Statement: Find out duplicate elements in Array.

PROBLEM 42

Problem Statement: Check Whether the specific element is present in array or not

PROBLEM 43

Problem Statement: Check the equality of two arrays

PROBLEM 44

Problem Statement: Reverse of array elements

PROBLEM 45

Problem Statement: Find out the even elements of array

PROBLEM 46

Problem Statement: Find out largest element of array

PROBLEM 47

Problem Statement: Print the duplicate elements of array.

LOGIC BUILDING PROGRAMS - C LANGUAGE

PROBLEM 48

Problem Statement: Find the sum of array.

PROBLEM 49

Problem Statement: Find the average of array.

PROBLEM 50

Problem Statement: Check which character is present on index 5

PROBLEM 51

Problem Statement: Check whether the string contains duplicate characters or not

PROBLEM 52

Problem Statement: Print the index of t in string : cravita

PROBLEM 53

Problem Statement: Check whether the string contains vowels or not

PROBLEM 54

Problem Statement: Find out index of specific character.

PROBLEM 55

Problem Statement: Check Login functionality using string functions.
